

# TRINITAS REGIONAL MEDICAL CENTER SCCAT PROGRAM

Presents

## *Treatment of OCD in Adults with Developmental Disabilities*

### Program Description

This workshop will focus first on reviewing diagnosis and cognitive behavioral treatment of Obsessive Compulsive Disorder. We will then review how Developmental Disabilities influence and complicate the presenting symptom picture and expression of OCD. Also, we will examine how DD with OCD makes for a more challenging application of the standard treatment protocol. Finally, we will review ways in which therapists and family members can adapt the standard CBT treatment for OCD to accommodate the special needs of those DD clients who have OCD.

**Presenter:** Allen Weg, Ed. D.
